**AMENDMENTS TO THE CLAIMS**

RECEIVED  
CENTRAL FAX CENTER

AUG 25 2006

1.-3 (Canceled)

4. (Currently Amended) A nucleic acid present in other than its natural environment, wherein said nucleic acid encodes an *Anthozoan* chromo- or fluorescent protein and is from a non-*Pennatulacean Anthozoan* species, wherein said protein has a sequence identity of at least about 95% ~~70%~~ with SEQ ID NO:12.

5. (Original) The nucleic acid according to Claim 4, wherein said nucleic acid is isolated.

6.-7 (Canceled)

8. (Currently Amended) A nucleic acid present in other than its natural environment that encodes a chromo and/or fluorescent protein, wherein said protein is either:

- (a) from a non-bioluminescent *Cnidarian* species; or
- (b) from a non-*Pennatulacean Anthozoan* and

wherein said protein has a sequence identity of at least about 95% ~~80%~~ with SEQ ID NO:12.

9. (Previously Presented) The nucleic acid according to Claim 8, wherein said non-bioluminescent *Cnidarian* species is an *Anthozoan* species.

10. (Original) The nucleic acid according to Claim 9, wherein said nucleic acid is isolated.

11. (Previously Presented) The nucleic acid according to Claim 9, wherein said protein has an amino acid sequence of SEQ ID NO:12.

Atty Dkt. No.: CLON-035CIP  
USSN: 10/006,922

**12-17 (Canceled)**

**18. (Currently Amended)** A-nucleic acid present in other than its natural environment that encodes a chromo and/or fluorescent protein that is either:

- (i) from a non-bioluminescent *Cnidarian* species; or
- (ii) from a non-*Pennatulacean Anthozoan* species;

wherein said protein has a sequence identity of at least about 95% ~~70%~~ with SEQ ID NO:12, and wherein said protein has an absorbance maximum ranging from about 300 to 700 nm.

**19. (Previously Presented)** The nucleic acid according to Claim 18, wherein said non-bioluminescent *Cnidarian* species is an *Anthozoan* species.

**20. (Currently Amended)** A construct comprising a vector and a nucleic acid that encodes a chromo and/or fluorescent protein that is either:

- (i) from a non-bioluminescent *Cnidarian* species; or
- (ii) from a non-*Pennatulacean Anthozoan* species; and

wherein said protein has a sequence identity of at least about 95% ~~70%~~ with SEQ ID NO:12.

**21. (Previously Presented)** The construct according to Claim 20, wherein said non-bioluminescent *Cnidarian* species is an *Anthozoan* species.

**22. (Currently Amended)** An expression cassette comprising:

- (a) a transcriptional initiation region functional in an expression host;
- (b) the nucleic acid according to Claim ~~[[1]]~~ **32**; and
- (c) a transcriptional termination region functional in said expression host.

**23. (Original)** A cell, or the progeny thereof, comprising an expression cassette according to Claim 22 as part of an extrachromosomal element or integrated into the

Atty Dkt. No.: CLON-035CIP  
USSN: 10/006,922

genome of a host cell as a result of introduction of said expression cassette into said host cell.

24-26 (Canceled)

27. (Currently Amended) A transgenic cell or the progeny thereof comprising a transgene comprising the nucleic acid according to Claim ~~[[1]]~~ 32.

28-30 (Canceled)

31. (Currently Amended) A kit comprising the nucleic acid according to Claim ~~[[1]]~~ 32 and instructions for using said nucleic acid.

32. (Currently Amended) A nucleic acid present in other than its natural environment, wherein said nucleic acid encodes a chromo- or fluorescent protein from a non-bioluminescent *Cnidarian* species, wherein said protein has a sequence identity of at least about 95% 80% with SEQ ID NO:12.

33. (Previously Presented) The nucleic acid according to Claim 32, wherein said protein has an absorbance maximum ranging from about 300 to 700 nm.

34. (Previously Presented) The nucleic acid according to Claim 32, wherein said protein has an absorbance maximum ranging from about 350 to 650 nm.

35. (Previously Presented) The nucleic acid according to Claim 32, wherein said protein has an absorbance maximum ranging from about 400 to 600 nm.

36. (Previously Presented) The nucleic acid according to Claim 32, wherein said protein has an excitation spectrum ranging from about 300 to 700 nm and an emission spectrum ranging from about 400 to 800 nm.

Atty Dkt. No.: CLON-035CIP  
USSN: 10/006,922

37. **(Previously Presented)** The nucleic acid according to Claim 32, wherein said protein has an excitation spectrum ranging from about 350 to 650 nm and an emission spectrum ranging from about 425 to 775 nm.

38. **(Previously Presented)** The nucleic acid according to Claim 32, wherein said protein has an excitation spectrum ranging from about 400 to 600 nm and an emission spectrum ranging from about 450 to 750 nm.

39. **(Previously Presented)** The nucleic acid according to claim 32, wherein said protein has an amino acid sequence of SEQ ID NO:12.

40. - 49. **(Canceled)**

50. **(Previously Presented)** The nucleic acid according to Claim 4, wherein said protein has an absorbance maximum ranging from about 300 to 700 nm.

51. **(Previously Presented)** The nucleic acid according to Claim 4, wherein said protein has an excitation spectrum ranging from about 300 to 700 nm and an emission spectrum ranging from about 400 to 800 nm.

52.-54. **(Canceled)**

55. **(Previously Presented)** The nucleic acid according to Claim 4, wherein said protein has one or more amino acid substitutions selected from amino acid substitutions at positions 2, 5, 9, 105, or 197 as compared to SEQ ID NO:12.

56. **(Previously Presented)** The nucleic acid of Claim 4, wherein said protein has one or more amino acid substitutions selected from R2A, K5E, K9T, V105A, and S197T as compared to SEQ ID NO:12.

57.-58. **(Canceled)**

Atty Dkt. No.: CLON-035CIP  
USSN: 10/006,922

59. **(Previously Presented)** The nucleic acid according to Claim 32, wherein said protein has one or more amino acid substitutions selected from amino acid substitutions at positions 2, 5, 9, 105, or 197 as compared to SEQ ID NO:12.

60. **(Previously Presented)** The nucleic acid of Claim 32, wherein said protein has one or more amino acid substitutions selected from R2A, K5E, K9T, V105A, and S197T as compared to SEQ ID NO:12.

61. **(Canceled)**

62. **(Canceled)**
